## KINETIX SOLUTIONS AWARDED A FOURTH MICROSOFT GOLD COMPETENCY IN CLOUD PLATFORM

Coconut Creek, Florida April 27, 2021– Kinetix Solutions a leader in providing cost-effective and innovative IT Managed Services, solutions, and software has been awarded a fourth Microsoft Gold Competency. Gold level certifications are the highest level of recognition awarded by Microsoft a partner can secure. To earn, they require a partner to demonstrate that they have mastered a comprehensive set of knowledge, and applied experience. Kinetix solutions has achieved Microsoft Gold Level Certifications in Small and Midmarket Cloud Solutions, Cloud Productivity, Application Development and now Cloud Platform.

The Microsoft Cloud Platform Gold Competency is designed to certify demonstrated expertise helping customers modernize their infrastructure and migrate applications and data to the cloud. The Microsoft Cloud Platform approach allows customers the benefit of scale, speed, and agility on the Microsoft Cloud, and encompasses many of the cutting-edge services and features of Microsoft Azure. An organization leveraging the Microsoft Cloud Platform can quickly build and deploy applications, and more flexibly support and manage IT services.

“Kinetix Solutions has a 20-year history of delivering the latest and most cost-effective technology solutions to help our customers reach their goals. These certifications highlight our commitment to excellence by being a knowledgeable and trusted partner, who invests in our customers long term success,” said Brad Ferguson, CEO of Kinetix Solutions. “Our customers are now not only often saving money they are doing things they did not even dream possible on the Microsoft Cloud Platform.”

About Kinetix Solutions: For over a decade Kinetix Solutions has been a leading provider of IT Managed Services, Cloud, Business Intelligence, and Custom Development solutions and direct software reseller. Local support teams paired with a 24 X 7 Support Center provide customers a seamless and cost-effective IT solution. This allows companies to focus on their business knowing that their IT infrastructure will be up and running and they will always have access to the latest innovative technologies.
